 Description: Financial Tracker

Story #	Card Front	Card Back	Sprint #	Priority	Assigned To	Comments	Est. Points
1	As a customer I want to be able to upload financial information so that I can accurately track them so that I can conveniently input and organize my financial data, ensuring accurate tracking and comprehensive management of my finances within the app.	The user should be able to upload their total budget, individual bills and current debts to keep an accurate track of finances within the app.	1	1	Winnie	-We should consider different methods for uploading financial information and their implications on user experience. - Let's define the scope of financial data to be uploaded	3
2	As a working adult who uses financial apps, I want to track my expenses by category so that I can better understand	The app should provide a user-friendly interface for tracking expenses categorized by type (e.g., groceries,	1	1	Winnie	Let's discuss potential metrics or visualizations to enhance user understanding within	4

	<p>where my money is going, So that I can make informed decisions about my spending habits, identify areas where I can save money, and achieve my financial goals more effectively.</p>	<p>utilities, entertainment).</p>				<p>each expense category. - Prioritizing a user-friendly interface design is crucial to facilitate easy tracking and analysis of expenses.</p>	
3	<p>As a recent college graduate who wants to budget better, I need an app that can help me assess my financial situation and goals So that I can effectively manage my finances and work towards financial stability and independence.</p>	<p>Users should receive personalized suggestions on budgeting, saving, investing, and debt management based on their financial situation and goals.</p>	1	1			3
4	<p>As a traveler who is not near a computer all the time, I want to manage my finances conveniently whether I'm using my smartphone, tablet, or computer, so that I can access my financial information and tools wherever I go.</p>	<p>Acceptance Criteria: The app should be accessible through iOS and Android and PCs</p>	1	1			5

5	As a business owner, I want to generate financial reports so that I can track the performance of my company and make informed decisions so that I can gain insights into the financial health of my business, identify trends, analyze profitability, and make strategic decisions to drive growth and success.	The app should summarize the reports in a clear and concise way to clearly provide information.	1	1			3
