	1 As a user I want to be able to upload financial information so that I can accurately track them so that I can conveniently input and organize my financial data, ensuring accurate tracking and comprehensive management of my finances within the app.	The user should be able to upload their total budget, individual bills and current debts to keep an accurate track of finances within the app.		2 High	Garrett	Successfully implemented the ability for users to upload total budget, bills, and debts, ensuring accurate and convenient financial tracking within the app.	3
	2 As a working adult who uses financial apps, I want to track my expenses by category so that I can better understand where my money is going, So that I can make informed decisions about my spending habits, identify areas where I can save money, and achieve my financial goals more effectively.	The app should provide a user-friendly interface for tracking expenses categorized by type (e.g., groceries, utilities, entertainment).		1 Low	Winnie	Successfully implemented expense tracking by category, offering a user-friendly interface for better understanding of spending habits and informed decision-making in achieving financial goals.	1
	DOING						
	3 As a recent college graduate who wants to budget better, I need an app that can help me assess my financial situation and goals So that I can effectively manage my finances and work towards financial stability and independence.	Users should receive personalized suggestions on budgeting, saving, investing, and debt management based on their financial situation and goals.		4	Praval	Developing personalized budgeting, saving, investing, and debt management suggestions within the app to assist recent college graduates in achieving financial stability and independence.	2
	5 As a business owner, I want to generate financial reports so that I can track the performance of my company and make informed decisions so that I can gain insights into the financial health of my business, identify trends, analyze profitability, and make strategic decisions to drive growth and success.	The app should summarize the reports in a clear and concise way to clearly provide information.		4	Garrett	In progress: Implementing functionality to generate clear and concise financial reports for business owners, enabling them to track performance, gain insights into financial health, identify trends, analyze profitability, and make informed strategic decisions to drive growth and success.	1
